IIUM Thesis LaTeX Class Manual

Mohammad Khalid Hussain

December 21, 2016

This is the abstract.

Note

The thesis format is ugly, so I decided to use Tufte's handout format instead. The aim of the `iiumthesis` class is to help prepare a thesis. This manual, however, has no such aim.

Usage

Start with a scaffholding of your document as such:

```
\documentclass{iiumthesis}

\begin{document}

\tableofcontents

% CONTENT HERE

\end{document}
```

Limitations

LaTeX

To be filled in later.

Pandoc

To be filled in later.
